

**CDP-7T top loading cd-player
20bit dual mono resolution / tube analog**

Reference tube analog integrated cd-player.

The best solution adopted for this really innovative cd-player as:

- 14 stages power supply**
- separate power supply with independent analog/digital power-switch**
- aerospace aluminium cabinet**
- proprietary software control**
- exclusive CD-disc clamp design**
- sophisticated selection of DAC dual mono PCM-63 BB**
- Pure Class A output triode really works (gain+filter) on signal path**
- Only one mkp special capacitor on signal path**
- Passive filter on signal path**
- Special damping solution on CDM two suspension stage solution by neoprene/lattice and PMMA solution similar as phono-record player introducing the motor spindle control energy filter (pat)**
- D-S-P digital oversampling filter**

CONVENIENCE and OPTIONAL

- **Cherry wood veneered side panels (on-series)**
- **Balanced output module XLR by supermallory transformer (optional)**
- **SPDF / AES-EBU / opto Toslink or ST-II digital output (optional)**
